Instead of banks and bankers being auxiliaries to the glorious cause of intelligence ed the libraries of the and friags of old criptures. They have during almost whole existence of the republic, since the adoption of the federal constitution swarmed like the rats of Egypt into our halls of legislation, and besieged the people's servants for privileges and immunities, which in the nature of things the great mass of the people, the farmers and mechanics, cannot enjoy-for charters, in fact, to enable them to swindle the people. They have filled and damned up the avenues of our legislative halls, and in some instances actually and impudently seated themselves among the members, as if the work of bank logrolling, chienough without the aid of cent. per cent. bears and bulls. The business of bank making with which legislators have no more right to meddle, than they have to meddle with printing or preaching, has been almost the the grand subject of legislation, in a country where every voter is expected to take a part in the government of the country-where every voter should be intelligent. The cause of the people, the cause of human impr ment, has been treedd with shameful neg lect, while sage legislators of the country have he reiving pay from the great mass of the puble for ministering to the vile and grovelling spirit of cupidity the "everlasting rankee dollar" spirit, which disgraces the merican character-the farmers and mics in this and every other state in Union have been paying members of the le-

tions millions of dollars per annum, to
